## DETAILED ACTION

### *Response to Amendment*

1. Receipt of applicant's amendment filed May 31, 2005 is acknowledged. Claims 8-10 are pending and claims 1-7 have been canceled.

### *Claim Objections*

2. Claim 9 is objected to because of the following informalities: Claim 9, line 5, the term "form" appears to be incorrect given the context. It appears it should instead be -- from--. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by COOLIDGE et al (US 2,642,520).
5. COOLIDGE discloses a flashlight (fig.1, col.1, lines 1-4) comprising an enclosed housing (battery 36, fig.3) having a closed internal volume (col.6, lines 8-30) and a passage (54,56, fig.7) extending to atmosphere (fig.3) from the closed internal volume to atmosphere; a light source (17, fig.1); an electrical circuit (25,26,27,28,29,30,31,34) extending from said housing (36) to said light source (17); and a one-way valve (col.3,

Art Unit: 2875

lines 33-36; 57-fig.7) in said passage (54,56) and adapted to permit gas to move from the internal volume to atmosphere (col.6, lines 23-30) while inhibit fluids from moving from atmosphere to the internal volume by any of the tight fitting of the collar valve (57) in the channel (56) so that liquid can pass and/or with the pressure force of gas escaping in one direction (col.6, lines 23-30); further comprising a head assembly (16) that is fluid tight when threadedly attached (fig.11) and connected to the housing (36).

### ***Allowable Subject Matter***

6. Claim 8 is allowed.
7. The following is a statement of reasons for the indication of allowable subject matter: Claim 8 has allowable subject matter not disclosed or suggested by the prior art of record: a water resistant flashlight having a valve in the passage extending from the internal volume sized to receive one or more batteries.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. SHIMIZU shows a water resistant flashlight (fig.1) having an internal volume (air chamber 50) receiving one or more batteries (dry cells 40), a passage (vents 21-fig.2; annular space between top 13 and bottom 13 in fig.5; or grooves 63 & 64 in fig. 5) extending from the internal volume (50) of the flashlight to atmosphere; an annular band (22 or 60) about and in the passage (21-fig.2; 63,64, figs.4 or 5) and adapted to permit gas to move from the internal volume (50) to

Art Unit: 2875

atmosphere while inhibiting fluids from moving from atmosphere to the internal volume (col.3, lines 41-65). MEAGER et al (US 2,897,345) show a gas-pressure relieving resilient collar (31,32,33) in water-tight association with vent passage (40) of the internal volume of the flashlight. BACON (US 2,855,497) shows a trigger valve housing (58) with plunger (74) in passage (72) that communicates with an internal volume of housing (container 18,10) of a flashlight.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
